ARCHITECTURAL & CAD ENGINEERING

High-precision 3D modeling, working drawings, interior space planning, material selections, and on-site implementation supervision for luxury residential and commercial projects.

SYSTEMS PROGRAMMING & HARDWARE

Low-level engineering in **Rust** & **C++**, STM32/ESP32 embedded dev, PCB milling, custom memory allocators, and compiler development for Arabic "ألف 5".

WORK HISTORY

2020 - 2026

SUMMARY

TECHNICAL SKILLS

Expertise

25-26

Feelgari

Oct 2025 - Sep 2026

TECHNICAL DESIGNER - Riyadh, Saudi Arabia

- Developed detailed technical drawings and 3D models for high-end residential and commercial interior projects.
- Created realistic 3D visualizations and renderings to communicate design concepts and support client presentations.
- Coordinated with architects, contractors, and suppliers to ensure accurate implementation of design specifications.
- Selected materials, finishes, and furnishings aligned with client preferences and project requirements.
- Optimized space planning and interior layouts to balance functionality, aesthetics, and efficient use of space.
- Conducted on-site inspections and resolved technical design issues to maintain quality and consistency with approved drawings.

Technical Designer and Programmer with experience in high-end interior design, 3D modeling, technical drafting, and embedded systems development. Skilled in creating detailed technical drawings, realistic visualizations, and functional design layouts for residential and commercial projects. Technical expertise includes CAD software, CNC machining, PCB milling, and programming in Rust, C++, and Python. Additional interests and experience include AI-powered applications, custom memory allocators, and interpreter development for the Arabic programming language "ألف 5".

24-25

AB Homes Interiors

Mar 2024 - Mar 2025

TECHNICAL DESIGNER - Riyadh, Saudi Arabia

- Designed and developed detailed technical drawings and 3D models for high-end residential and commercial interiors.
- Coordinated with architects, contractors, and suppliers to support smooth project execution.
- Created realistic 3D visualizations and presentations to communicate design concepts effectively.
- Selected materials, finishes, and furnishings aligned with client preferences and project requirements.
- Optimized space planning and design layouts to enhance functionality and aesthetics.
- Conducted on-site inspections to verify that designs were accurately implemented.
- Researched and integrated contemporary interior design trends and innovative solutions into projects.

EDUCATION

Jul 2025

Bachelor of Science in Computer Science AOU | Riyadh, Saudi Arabia

Focus on software architecture, algorithms & low-level computing systems.

Art Deco Design

Apr 2021 - Mar 2024

TECHNICAL DESIGNER - Riyadh, Saudi Arabia

- Developed detailed technical drawings and 3D models for Art Deco-inspired interior and exterior designs.
- Collaborated with architects and engineers to ensure design feasibility and structural integrity.
- Created high-quality visualizations and renderings to present design concepts to clients.
- Used CAD and 3D modeling software to refine and optimize design solutions.
- Researched Art Deco styles and incorporated historical elements into modern design applications.

20-21

شركة مهام لتقنية المعلومات

Dec 2020 - Apr 2021

DESIGNER - Riyadh, Saudi Arabia

- Designed digital and print media assets, including branding materials, marketing visuals, and UI/UX elements.
- Developed creative concepts for websites, mobile applications, and corporate identity projects.
- Collaborated with developers to integrate design elements into digital platforms.
- Created social media graphics and promotional materials to enhance brand presence.
- Researched design trends and user experience practices to improve project outcomes.
- Managed multiple design projects within tight deadlines while maintaining high-quality standards.
